## WORK EXPERIENCE

### Data Driven Internship Project — *Global Team Blue(GTB)*

Designed prototype for Ford Motor Company using open data.

### AARP UX/UI/Service Design collaboration — *S.C.A.D Collaborative Project*

Participated in a UX/UI design collaboration with AARP.

## PROGRAMS

### Recoup Project — Javascript/HTML5

Used Javascript ajax requests to query API's with promises to request json from 2 different API's. Users can search for their favorite food to find recipe's and nearby restaurants with that specific searched food.

### Live Search — Javascript/HTML5/Express/Node/SQL

Used Express and Node to run a server that uses sequelize to generate data. Quickly navigate a lecture on a specific web development topic.

### Password Generator — Javascript/HTML5

Uses vanilla javascript to generate a random password based on user-selected criteria.

### Website Blocker — Python

Using the datetime python library this application allows you to block specific websites at specific times. Great for productivity.
