WORK EXPERIENCE

Data Driven Internship Project — *Global Team Blue(GTB)*

Designed prototype for Ford Motor Company using open data.

AARP UX/UI/Service Design collaboration —*S.C.A.D Collaborative Project*

Participated in a UX/UI design collaboration with AARP.

PROGRAMS

Recoup Project — *Javascript/HTML5*

Used Javascript ajax requests to query API's with promises to request json from 2 different API's. Users can search for their favorite food to find recipe's and nearby restaurants with that specific searched food.

Live Search — *Javascript/HTML5/Express/Node/SQL*

Used Express and Node to run a server that uses sequelize to generate data. Quickly navigate a lecture on a specific web development topic.

Password Generator — *Javascript/HTML5*

Uses vanilla javascript to generate a random password based on user-selected criteria.

Website Blocker — *Python*

Using the datetime python library this application allows you to block specific websites at specific times. Great for productivity.
